## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 7-12, drawn to a recording medium.

Group II, claim(s) 3-6, 17-19, drawn to a recording medium.

Group III, claim(s) 13, 20, drawn to a method of recording/reading.

Group IV, claim(s) 14-16, 21, drawn to an apparatus for recording/reading.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The feature of a recording layer formed of a polydiacetylene or merocyanine in claims 1-2 and 7-12 is found in the prior art as shown in the International Search Report. Therefore, this is not a special technical feature and the claims are not linked.

During a telephone conversation with Mr. Saralino on March 10, 2008 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-2, 7-12. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-6 and 13-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1794

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 7-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US 5,559,784 or US 5,449,590.

The references each disclose a multi-layered optical recording medium having multiple recording layers and spacer layers. The '784 patent discloses a polydiacetylene recording layer and the '590 patent discloses a merocyanine recording layer. The method limitations of claims 7-10 are seen to be inherent characteristics of the disclosed materials.
